Huashang College Guangdong University of Finance & Economics

Guangzhou China

Bachelor in Financial Engineering

09/2019-06/2023

Main courses: Financial Metrology; Economics; Financial Statement Analysis; Corporate Finance

PROFESSIONAL EXPERIENCE

Haisheng Financial Leasing

Foshan China

Project Manager Assistant

08/2025-Now

- **Due Diligence & Report Writing:** Led 10+ client due diligence projects end-to-end — scoping requirements, synthesizing multi-source data, identifying risk factors, and drafting approval reports that directly shaped deal structure.

Guoyuan Securities Company Limited

Shanghai China

Automotive Group Analyst

07/2024-11/2024(4 months)

- **Industry & Company Research :** Contributed to 5 in-depth industry and company research reports; deconstructed business models, assessed competitive landscapes, and produced valuation updates to support investment decisions.
- **Financial Analysis & Valuation:** Collected and analyzed industry and company financial data, evaluating key metrics including revenue, profitability, expenses, and cash flow; updated financial analysis frameworks and valuation models to support investment research and decision-making.

HSBC

Foshan China

Financial service clerk

01/2023-06/2023(6 months)

- **Automated Process Optimization:** Diagnosed failure points in automated fund NAV workflows; collaborated with Risk and IT to redesign process logic, reducing operational error rates by 20%.

PROJECT EXPERIENCE

AI Product for Intelligent Resume Compilation Assistant

04/2026-Now

- **Requirement Insight & Product Architecture:** Identified authenticity and job-fit as the core resume application challenges; designed a Master-Sub architecture to support JD-specific resume optimization while preserving source-of-truth data.
- **Core Product Development & AI Integration:** Led the product upgrade, design, development, deployment, and launch process, integrating LLM workflows for resume analysis, matching, rewriting, and export.
- **Matching Strategy & User Experience Design:** Designed a structured JD analysis + semantic matching framework to improve matching accuracy and cross-language applications, while using fixed-template exports to ensure resume consistency and professionalism.

AI Product for Investment Research Efficiency

01/2026-Now

- **Demand Insight & Analysis:** Conducted user interviews and process reviews to identify pain points (fragmented data, slow retrieval); defined success metrics and translated insights into a "one-stop aggregation engine" product spec.
- **Workflow Development & Implementation :** Designed feature workflow (intelligent search → multi-source aggregation → refined output) and built on Coze integrating DeepSeek, knowledge-base retrieval, and Web Search plugins; iterated on prompt engineering and output structure based on user feedback.
- **Iteration & Impact Validation:** 50% improvement in internal knowledge search efficiency, 60% improvement in external data collection — directly reducing cross-platform retrieval time.
